Programming Languages, Tools and Framework

- Languages: Python, C++, Java, JavaScript, PHP, Dart, Kotlin
- Frameworks & Libraries: React, Express, Node.js, Flutter
- Databases & Backend: MySQL, MongoDB, Firebase
- Design & Tools: Figma, Git, Canva

Core Work Skills

- Critical Problem Solving
- Cross-Functional Collaboration
- Adaptability & Resilience
- Continuous Learning
- Creative Innovation
- Technical Communication

Technical Skills

- Project Management
- Software Development
- UI/UX
- Database Management
- IoT Integration
- Quality Assurance

Profile Summary

Bachelor of Science in Information Technology student with hands-on experience developing web, game and mobile applications, database systems, and IoT-based solutions. Skilled in front-end development, UI/UX design, data management, system integration, and collaborative project development. Detail-oriented, adaptable, and eager to apply technical knowledge in a professional environment while contributing to practical solutions that support users and business needs.

Education

Elementary

2010-2016

West Central Elementary School 1

Highschool

2017-2022

St. Albert the Great School

College (BSIT)

2023-Present

University of Pangasinan

Projects

- **Drive Wise Dealer** – A web-based car dealership platform designed to help users browse available vehicles, view detailed car information, and explore listings through a clean and organized interface.
- **Jungle Venture** – A Java-based adventure game where players can choose different expeditions, complete challenges, and progress through a jungle-themed environment with interactive gameplay elements.
- **Flickseat** – A movie ticket booking application that allows users to browse movies, check available schedules, select preferred seats, and manage their bookings through a simple and user-friendly interface.
- **Flicksuru** – A Kotlin-based mobile movie application that allows users to discover films, view movie details, and organize their selections through a convenient and visually engaging mobile experience.
- **FigureVerse** – A Python-based collectible figure platform developed to help users browse, manage, and explore different figure collections through an organized and accessible interface.
- **Learnease** – An AI-powered learning platform designed to support students by providing personalized learning assistance, access to educational resources, and a more organized and interactive study experience.
- **SoilSense** – An IoT-based soil monitoring and crop decision-support system that collects real-time soil data such as NPK, pH, moisture, temperature, and EC. It provides soil analysis, crop suitability ranking, and smart crop recommendations through a connected mobile application and web-based administration system.

FigureVerse

1st year 1st Sem

Role: Project Manager, Lead Developer

Tech stack: Python

2023

Drive Wise Dealer

1st year 2nd Sem

Role: Project Manager, Lead Developer

Tech stack: HTML, CSS, Javascript

2023

ESTEVE NASH T. CALICDAN

BSIT Student

Jungle Venture

1st year 2nd sem

Role: Lead Developer

Tech stack: Java

2023

Flickseat

2nd year 2nd Sem

Role: Assistant Developer, Frontend

Tech stack: Kotlin, PHP, MySQL,

XAMPP, API

2024

ESTEVE NASH T. CALICDAN

BSIT Student

Flicksuru

2nd year 1st Sem

Role: Assistant Developer

Tech stack: Kotlin, PHP,

MySQL, XAMPP, API

2024

LearnEase

3rd Year 1st Sem- 2nd Sem

Role: Lead Developer

Tech stack: React JS,

Tailwind, MERN

2025

SoilSense

4th Year 1st Sem Capstone Project
Role: Lead Developer
Tech stack: React, Javascript,
Tailwind CSS, Firebase, Flutter,
Dart, C++, HTML
2025
